Moieez ur Rehman

AI Engineer | Senior Full-Stack | TypeScript | Node.js | React/Next.js

Email: moiezdev@gmail.com | Phone: +966 573240913 | LinkedIn: linkedin.com/in/moiezdev | GitHub: github.com/moiezdev | Portfolio: www.moiez.dev | Transferable Iqama | Available Immediately | Riyadh, Saudi Arabia

Professional Summary

AI Engineer and senior full-stack developer with 7 years of experience building production systems in TypeScript, Node.js/NestJS and React/Next.js, specialised in retail and SaaS: POS platforms, loyalty programs, payment integrations and e-commerce. Builds LLM-powered features with OpenRouter (DeepSeek), including smart menu search, AI-based analysis of restaurant data and a client-facing support chatbot. Designed and built a restaurant POS and loyalty platform end-to-end, including Apple/Google Wallet passes, event-driven background processing, and a ~64% reduction in API response times. Experienced with payment gateways (MyFatoorah, Moyasar), authentication (OAuth2, JWT, SSO, RBAC) and CRM integrations. Uses AI coding tools (Claude Code, Cursor, GitHub Copilot) to ship faster, while owning the design, review and testing of everything that reaches production.

Core Skills

Languages & Backend: TypeScript, JavaScript (ES6+), SQL | Node.js, NestJS, Express, Fastify, .NET (ASP.NET Core, C#, Entity Framework) | REST APIs, webhooks, event-driven architecture

Frontend: React.js, Next.js, Redux, Zustand, TanStack Query, Tailwind CSS

Data: PostgreSQL, MySQL, MongoDB, SQL Server, Prisma ORM, Redis (caching, BullMQ queues)

AI & LLM Engineering: LLM features with OpenRouter (DeepSeek): smart search, data analysis, chatbots; AI-assisted development with Claude Code, Cursor, GitHub Copilot; writing specs and prompts, reviewing and testing AI-generated code

Integrations: Payment gateways (MyFatoorah, Moyasar), ZATCA e-invoicing (Fatoora), Apple & Google Wallet, CRM systems, OpenRouter AI (DeepSeek)

Security & Performance: RBAC, OAuth2, OIDC, JWT, SSO, caching, database indexing, code-splitting, lazy loading

Tools & Also Used: Git, GitHub, GitLab CI/CD, Docker, Vercel, Jira, Agile/Scrum | Vue.js, Nuxt.js, Laravel/PHP, Flutter

Professional Experience

Senior Software Engineer | Full-Stack Developer

TWLM - Saudi Arabia **Feb 2025 - Present**

- Designed and built a restaurant POS platform with integrated loyalty, promotions and wallet features, from architecture through production delivery.
- Built a block-based page builder that lets businesses create and manage their own menus and e-commerce storefronts without developer help.
- Reworked core user flows based on support data, reducing customer support requests by ~70%.
- Implemented four loyalty features (points, loyalty passes, gift cards and discount coupons) with Apple Wallet and Google Wallet passes and real-time updates.
- Built a geo-targeted promotional messaging system with branch-level campaign tracking.
- Optimized backend performance, reducing API response times by ~64%.
- Set up the data layer with Prisma ORM and PostgreSQL, including schema migrations and query optimization.
- Implemented RBAC and OAuth2/JWT authentication with SSO for multi-role access across the platform.
- Built webhook-driven, event-based workflows with Redis-backed BullMQ workers to process notification and wallet-update jobs asynchronously.
- Integrated CRM and leasing platforms to keep customer and business data in sync.
- Integrated ZATCA e-invoicing (Fatoora) for Saudi tax compliance, generating and submitting compliant invoices from the POS platform.
- Integrated OpenRouter AI (DeepSeek) to add smart menu search and AI-based analysis of restaurant data.

Senior Software Engineer | .NET Backend

ACCIONA - Saudi Arabia **Jan 2024 - Feb 2025**

- Improved internal operations by digitizing workflows and reducing system downtime by ~25%.
- Built internal reporting and analytics dashboards in React, backed by .NET APIs and SQL Server.
- Built, maintained and extended .NET (ASP.NET Core / C#) backend services and REST APIs for internal tools, with SQL Server as the data layer.
- Implemented RBAC and OAuth2/JWT-based authentication across the .NET APIs and internal dashboards.
- Identified and resolved system bottlenecks, improving performance and ensuring smoother day-to-day operations.
- Automated routine processes and reporting tasks, increasing efficiency and reducing manual workload.

Senior Frontend Engineer

Santa Casa da Misericórdia de Borba - Portugal (Remote) **Oct 2022 - Jan 2024**

- Delivered 8+ projects across SaaS, e-commerce, and education platforms.
- Built scalable, high-performance UIs using React, Vue, Nuxt, and Tailwind.
- Developed and integrated REST APIs using Node.js and Express.
- Improved application performance using code-splitting, lazy loading, and optimized rendering.
- Deployed applications using CI/CD pipelines (GitLab) and platforms like Vercel.
- Implemented OAuth2/JWT-based authentication and SSO integration for client platforms.
- Translated Figma/XD designs into production-ready, responsive interfaces.
- Collaborated directly with clients to understand requirements and translate business needs into scalable technical solutions.
- Debugged complex production issues and provided optimized solutions, improving system reliability and user experience.
- Built reusable components and modular architectures, reducing development time and improving maintainability across projects.

Frontend Engineer to Senior Frontend Engineer

Creative Inter Tech - Faisalabad, Pakistan **Mar 2020 - Oct 2022**

- Led frontend for B2B travel platforms (AA Tourism, City Arrivals) serving 10K+ monthly users.
- Built reusable component libraries in React/Vue, cutting dev time by ~30%.
- Collaborated in Agile teams, improving UX and boosting user retention by 15%.
- Upgraded legacy projects with React/Vue, improving responsiveness by 25%.
- Applied Redux, Vuex, and hooks for scalable state management, reducing data-related bugs by 40%.
- Implemented role-based access control (RBAC) for platform user permissions and admin workflows.
- Enhanced performance with React.memo and render optimizations.

Web Developer

Content Arcade - Faisalabad, Pakistan **May 2019 - Mar 2020**

- Built responsive layouts using HTML, CSS, Bootstrap.
- Supported backend with PHP, Laravel, and MySQL APIs (CRUD).
- Performed bug fixes and cross-browser testing, improving stability.

Some of My Key Projects

TWLM POS & Loyalty Platform

B2B2C POS and CMS platform for restaurants and retailers: cashier POS, Gulf tax integration, inventory, loyalty programs, gift cards, customizable e-menu and ordering pages, and 30+ CMS features.

AA Travel & Tourism

Flight booking and tour planning platform, integrated with Sabre and Amadeus booking engines and IATA codes.

Gala Travels (galatravels.com)

Flight, hotel, vacation and cruise booking platform for a travel agency, with a Laravel backend.

SCM Borba

A web platform developed for managing digital presence and services, including content management and user interaction features. Built as a full-stack application using Node.js, Express.js, and Vue.js/Nuxt.js, focusing on performance, usability, and maintainability.

Company Support Chatbot (AI Project)

An AI-powered chatbot built using OpenRouter AI (DeepSeek) to help clients learn about a company's profile, services, and support information in real time. Also integrated into my personal portfolio (www.moiez.dev) to demonstrate AI-driven, agentic workflows.

City Arrivals (cityarrivals.ca)

Luxury car booking platform in Canada, built for B2B travel operations alongside AA Travel & Tourism.

EIMS (Current Project) - AI-Powered Learning Management System

Currently developing an AI-powered learning management system, built with a .NET backend, that helps students select the right courses based on their interests and goals, using AI-driven recommendations to personalize the learning path.

Education

BSCS Hons - Bachelor of Science in Computer Science
National College Of Business Administration & Economics Lahore | 2017-2021
